The speakers highlighted the investment opportunities lying ahead and the ways of reaching the $5 trillion economies by 2024-25. Mr. Gupta highlighted the different sectors contributing to the major share in the Indian economy, and the steps that the government has taken to increase the productivity of these sectors and engage more manpower in these sectors.

Mr. G P Hinduja emphasized that although India is seeing major investment opportunities in the country, the road is full of thorns. It is difficult to achieve the $5 trillion target in the next 5 years. Certain laws and processes should be made to speed up the entire process and for ease of doing business in India. Mr. Hinduja mentioned that the OCIs all over the world are ready to invest in the country provided that process gets simplified, consumes less time, and becomes more practical.

Mr. Kapil Dev, on the other hand, showed his confidence in the fact that India will definitely see a huge economic growth in the near future. He stated that although it may take some time to achieve the target, we must be patient, follow the law and go by the legal procedure. Mr. Dev mentioned that India is a peace-loving country that is ready to do business, and welcomes all the investors to invest in the country.

The event ended by presenting eight IEBF Excellence Awards to the business leaders for their excellent achievements in their various sectors.
